

CHECKLIST 3A

MAP OF EXISTING SITE

- Draw the approximate property boundaries.
- Draw the road(s) that run(s) in front or adjacent to your property. Include the name(s) of road(s).
- Draw buildings as they exist on the property and their approximate shapes.
- Draw and label surface waters, including locations of wetlands, streams, rivers, lakes, ponds, coastal waterways, and their buffers (as discussed with local Conservation Commission), on or near your property. Remember, even offsite wetland and water resource areas can impact what you are allowed to do on your property.
- Draw existing wooded areas or areas with native grasses and shrubs.
- Draw groundwater protection areas (as known).
- Indicate service utilities such as private water supply wells and septic systems, public water and sewer connections, gas lines, electrical, telephone, and cable lines, including pole locations, and any easements on property (as known).
- Draw existing drainage features and patterns, including roof drains, swales/ditches, low areas, culvert crossings, roads and trails, storm drains and catch basins with general flow arrows.
