

STORMWATER RUNOFF SITE MANAGEMENT

Use the following questions to help guide your hobby farm stormwater runoff site management decisions:

CHECKLIST TIPS

- Keep in mind that some of the BMP's listed in Section 6 can be used to achieve more than one of the site management goals listed below.
- When considering potential BMP locations, it is often helpful to walk your hobby farm during or immediately following rain to observe stormwater runoff patterns.

Which Best Management Practices (BMPs) are either currently used or could be applied to your hobby farm to achieve the following (list specific BMPs and potential locations):

- DISCONNECT stormwater flows, allowing precipitation to soak into the ground closer to where it lands

DISCONNECTION PRACTICE	EXISTING LOCATION	OTHER POTENTIAL LOCATIONS

- REROUTE stormwater flows, to prevent or minimize stormwater contact with potential pollutants (e.g., manure storage areas)

REROUTING PRACTICE	EXISTING LOCATION	OTHER POTENTIAL LOCATIONS

- PROVIDE TREATMENT AND NATURAL FILTRATION of stormwater before it can reach nearby wetlands and surface waters

TREATMENT/FILTRATION PRACTICE	EXISTING LOCATION	OTHER POTENTIAL LOCATIONS
